CAREER SUMMARY

Working as an Expert Software Architect at Finastra Technologies, Pune — leading full-stack development teams building cloud-native microservices and web applications for the Corporate Banking (B2B) domain. Joined in 2020 with 5+ years of experience in driving technical and process change, defining strategy and roadmap for application modernization, and migrating on-premise applications into the public cloud (Azure). Proven ability to coach and lead diverse application and data engineering teams of 20+ to deliver digital payment solutions with resiliency-based patterns and contract-driven service development. Expertise in Java/Spring Boot, TypeScript/Angular, SQL and NoSQL data storage, and event-driven messaging. Before Finastra, worked as a Manager at SmartStream Technologies, Mumbai, from 2006 with over 14 years of experience in solution development and external party integrations within the BFSI domain. Prior to SmartStream, worked at Exceed Consultancy Services as a Software Engineer cum Build/Release Engineer, gaining around 2.5 years of experience in developing productivity and reporting tools.

WORK EXPERIENCE

Expert Software Architect — Finastra

2020 - Present

Responsible for the architecture and technical solution design of new microservices as part of the Cash Management modernization journey. One key responsibility is to ensure high-quality development with stringent compliance in security, code quality, test automation, performance tests, penetration tests, and disaster recovery tests. Primarily, this is done by enabling the engineering team and closely coordinating with specialized teams. Experienced in developing and managing Liquidity Management (FLM), Multi-Factor Authenticator (MFM), Cross-Currency Network (CCN), and Virtual Account Manager (VAM). Also responsible for promoting these microservices on Fusion Operate, a managed hosted environment on Azure cloud. Currently transitioning to new team **Center Of Excellence (CoE) for AI**.

Achievements:

- Enabled engineering team to achieve 20% productivity gain through adoption of GitHub Copilot Agent Mode and GenAI tools
- Design and developed Agentic AI solution to decode sweep transactions
- Responsible for Architecture and solution design of Liquidity Management Solution that comprises of Liquidity UI, Liquidity service, Balance service, Netting service and Cashflow forecast (CFF) service
- Experience in producing high level and low level technical design
- Expertise in regular reviews of low level technical design and code reviews
- Close coordination with Principal Software Architect to review new technical solution
- Ensure the rating **'A'** in quality gates for all the microservices
- Responsible for performance tests and performance tuning for new services
- Responsible for penetration tests and relevant fixes for new services
- In GenAI (x)po 2.0 Jan 2025, won prize for Stratathon best Lending BU Submission
- Active participation in the development of Liquidity Management, Virtual Account Manager, Multi-Factor Management, Cross Currency Network
- Drove contract-driven service development using OpenAPI/Swagger specifications for all microservices
- Implemented resiliency-based patterns (retries, failover) for enterprise integration
- Built solutions integrating with external systems including core banking system, foreign exchange systems and third-party providers
- Coached and mentored diverse engineering teams across application development and data engineering
- Defined strategy and roadmap for Cash Management modernization aligned with business and technical requirements
- Managed a team of 20+ personnel including FTE and Contract resources
- Arranged for multiple interview drives in close coordination with HR
- Active participation in weekly and monthly reporting to senior management (VP and Senior Directors)
- Active participation in quarterly Program Increment (PI) planning and interim Sprint planning
- Used Azure DevOps deployment pipeline to promote microservices through stages Dev, Perf, UAT, Production and DR
- Continuous learning on Data Architecture, Large Language Model

Technologies used:

Github Copilot Agents · Java/J2EE · Oracle DB · Postgresql · Liquibase · Mybatis · OpenAPI / Swagger · SpringBoot · Camel · Angular · Figma · Adobe XD · Material Design · VSCode · NPM and Nodejs · Markdown and Mermaid · Active MQ · IBM MQ · Rabbit MQ · POI · JMS · JMX · Java17 · Ant · Azure DevOps · Github Actions · Docker · Kubernetes · AppDynamics · Grafana and Prometheus · CodeQL · Arnica · Checkmarx · Mend (formerly Whitesource) · Burp Suite

Technical Lead — SmartStream

2006 - 2020

Responsible for adapting client requirements to technical requirements in order to develop an appropriate solution for the customer. Responsibilities include analyzing process flows, consulting with clients, preparing design documents, taking part in project meetings, and supporting pre-sales staff. Extensive experience in development of Reference Data Utility (RDU) and Fees and Expense Management solutions (FEMS). In RDU worked with a small team to setup ETL / Data pipeline where security data is ingested from various stock exchanges and secuity data vendors like Bloomberg and Reutors. Data pipeline was responsible for cleansing data, cross referencing and distribute data reports based on customer subscriptions.

Achievements:

- Recognized as subject matter expert for TLM Transaction Fees and Invoice Management solution (TFIM) with-in FEMS business unit
- Contributed on daily basis towards Full Managed Services offering of TFIM On-Demand
- Contributed on weekly basis towards Application Support of TFIM On-Premise client
- Worked with clients post-implementation on user testing, debugging, support and maintenance
- Co-ordinated project planning, resource allocation, scope, schedule, status and documentation
- Conducted technical workshops and education sessions for customers, development, testing and dev-ops teams
- Managed team of 10 personnel focused on implementing resolutions and updates
- Collaborated closely with senior management to drive strategy through development and implementation of new processes
- Recommended architectural improvements, design solutions and integration solutions
- Improved development quality by implementing use of productivity tools like JIRA, Confluence, Bamboo, Jenkins, Sonar, BitBucket, Pull-request reviews, etc.
- Worked with quality assurance team to set up scripts, test case and automation protocols
- Development team re-presentative during SOC2 Type-II compliance audit
- Contributed in many TLM solutions - a) Transaction Fees and Invoice Management, b) Morpheus, c) Exception Management, c) Corporate Action Services and d) Reference Data Utilities (RDU)
- Gain expertise in a) Troubleshot of performance issues, b) Enterprise Integrations and c) User Interface development

Technologies used:

Java/J2EE · ActiveMQ · Oracle DB · MySQL DB · PL/SQL · SpringBoot · Camel · PDFBox · POI · JAXB · JMS · JMX · RMI · REST · JBoss · WAS · WebLogic · Drools · MVEL · SmartClient/SmartGWT · RAP/RCP · JQuery · OSGi · Fuse / ServiceMix · Rackspace · AWS

Software Engineer cum Build Release Engineer — Exceed Consultancy Services

2004 - 2006

Responsible for contributing to product development as Java developer and managing processes around build / release. Contributed towards production support after gaining expertise on relevant products.

Achievements

• Provided application support for Actuate Formula One e-Reporting application
• Contributed in development of many productivity tools - a) Functional Test, b) Load Test, c) Java Profile and d) Agentless Monitor
• Migration of Java Swing UI to Eclipse SWT UI
• Gain expertise in developing COM/DCOM for establishing communication between Java application and Internet Explorer in-order to record/replay tests
• Gain experience of java bytecode manipulation using JVMPI and JVMTI
• Gain experience of installers - a) InstallAnyWhere and b) Install4J
• Coordinated scheduled releases and updates

Technologies used:

Swing · SWT · PDE · VC++ · JNI · Unix · MacOSX · HTML · JavaScript · CSS · Tomcat · HSQL

SKILLS & TOOLS

Domain
- Corporate Banking
- Account Payables and Receivables
- Investment Banking
- Productivity Tools

Software Architecture
- MS Visio, Mermaid, Drawio
- ASVS, SAMM, Threat Modeling
- Architecture Governance
- Application Sizing

Artificial Intelligence
- GitHub Copilot Agent Mode
- Prompt Engineering
- ChatGPT, Gemini & NotebookLM
- Azure OpenAI Services

Cloud Technologies
- Azure DevOps CI/CD & Github Actions
- Cloud Shell (Google & AWS)
- Azure Postgres PaaS
- Azure Monitor & Log Analytics
- AWS console
- AWS EC2 and S3
- AWS Domain & SSL

Frontend
- TypeScript / Angular & Material design
- JQuery / SmartClient
- GWT / SmartGWT
- Bootstrap 4 & 5
- Swing / SWT
- TLM™ SmartStudio
- Apache Causeway Viewer

Backend
- Spring / Camel / ServiceMix
- Hibernate / Datanucleus / MyBatis
- TLM™ Control
- Apache Causeway Domain Services
- Oracle/MySQL/MongoDB/H2/Postgres

Data Engineering
- ETL / Data Pipeline
- SQL and NoSQL Data Storage

Project Management
- Aha! Roadmap Software
- Portfolio for JIRA
- Microsoft Office 365
- Microsoft Teams
- Agile and Scrum

Mobile
- Android Studio
- Firebase

Others
Generative AI · DevOps · Code Review · Git · Ofbiz & Scipio · Unit Testing · Agile · JIRA · Wiki · CI · AWS · Blockchain · Eclipse & VSCode · Drools / MVeL · B2B Payments · Full-Stack Development · Resiliency Patterns · Contract-Driven Development · Event-Driven Architecture · GitHub Copilot Agent Mode

EDUCATION

PGD in Software Technology
C-DAC (formerly NCST)
2003 - 2004

B.Sc. Physics
Mumbai University
2001 - 2003

LANGUAGE

English (Professional)
Hindi (Professional)
Gujarati (Native)
Marathi (Native)

INTERESTS

Movies, Shows and Shonens
Travelling
Reading Books
Cricket and Football
