CAREER SUMMARY

Working as Senior Manager at Finastra Technologies, Pune since 2020 with 4+ years of experience in developing cloud native microservices for Corporate Banking domain. Before Finastra worked as Manager at SmartStream Technologies, Mumbai from 2006 with over 14+ years of experience with solution development in BFSI domain. Before SmartStream, worked at Exceed Consultancy Services as Software Engineer cum Build/Release Engineer. Around 2.5 years of experience in developing productivity tools and reporting tools.

WORK EXPERIENCE

Senior Manager Development Operations

Finastra

2020 - Present

Responsible for architecture and technical solution design for new microservices as part of Cash Management modernization journey. One of the key responsibility is to ensure high quality development with stringent compliances of security, code quality, test automation, performance tests, penetration tests and disaster recovery tests. Primarily this is done by enabling engineering team and close coordination with specialized teams. Experience in developing and managing Multi-Factor Authenticator (MFM), Cross-Currency Network (CCN) and Virtual Account Manager (VAM). Also, responsible to promote these microservices on Fusion Operate, which is managed hosted environment on Azure cloud. Currently working on architecture and solution design of Liquidity management services.

Achievements:

- Responsible for Architecture and solution design of Liquidity Management Solution that comprises of Liquidity UI, Liquidity service, Balance service, Netting service and Cashflow forecast (CFF) service
- Experience in producing high level and low level technical design
- Expertise in regular reviews of low level technical design and code reviews
- Close coordination with Principal Architect to review new technical solution
- Successfully completed trainings on Generative AI and Licese to lead programs
- Ensure the rating 'A' in quality gates for all the microservices
- Responsible for performance tests and performance tuning for new services
- Responsible for penetration tests and relevant fixes for new services
- Hackathon participation for innovation followed by a working prototypes and arranging for relevant demo
- Successfully managed development of Multi-Factor Management (MFM), Cross Currency Network (CCN) and Virtual Account Manager (VAM)
- Managed a team of 20+ personnel including FTE and Contract resources
- Arranged for multiple interview drives in close coordination with HR
- Active participation in weekly and monthly reporting to senior management
- Active participation in quarterly Program Increament (PI) planning and interim Sprint planning
- Conducted regular sprint retrospective and rollout agreed process changes wherever required
- Used Azure DevOps deployment pipeline to promote microservices through stages Dev, Perf, UAT and Production
- Used Azure DevOps deployment pipeline to conduct regular disaster recovery tests

Manager | Project Lead | Team Lead | Software Engineer

SmartStream

2006 - 2020

Responsible for adapting client requirements to technical requirements in order to develop an appropriate solution for the customer. Responsibilities include analyzing process flows, consulting with clients, preparing design documents, taking part in project meetings, and supporting pre-sales staff. Extensive experience in development of Reference Data Utility (RDU) and Fees and Expense Management solutions (FEMS)

Achievements:

- Recognized as subject matter expert for TLM Transaction Fees and Invoice Management solution (TFIM) with-in FEMS business unit
- Contributed on daily basis towards Full Managed Services offering of TFIM On-Demand
- Contributed on weekly basis towards Application Support of TFIM On-Premise client
- Worked with clients post-implementation on user testing, debugging, support and maintenance
- Co-ordinated project planning, resource allocation, scope, schedule, status and documentation
- Conducted technical workshops and education sessions for customers, development, testing and dev-ops teams
- Managed team of 10 personnel focused on implementing resolutions and updates
- Collaborated closely with upper management to drive strategy through development and implementation of new processes
- Recommended architectural improvements, design solutions and integration solutions
- Improved development quality by implementing use of productivity tools like JIRA, Confluence, Bamboo, Jenkins, Sonar, BitBucket, Pull-request reviews, etc.
- Worked with quality assurance team to set up scripts, test case and automation protocols
- Development team re-presentative during SOC2 Type-II compliance audit
- Contributed in many TLM solutions - a) Transaction Fees and Invoice Management, b) Morpheus, c) Exception Management, c) Corporate Action Services and d) Reference Data Utilities (RDU)
- Gain expertise in a) Troubleshoot of performance issues, b) Enterprise Integrations and c) User Interface development

PERSONAL PROJECTS

Statements Manager

Open Source

https://github.com/Jayeshecs/statements

Primary objective of this project was to facilitate personal finance management. Ease of uploading bank account statement via plug-in architecture. Secondary objective was to evaluate Apache Causeway framework and try DeepLearning4j framework for automatic categorization of transactions.

Achievements:

- Moduler project structure
- Add-on support for custom statement reader
- Inbuilt support for HDFC Bank, Kotak Bank, PayTM
- Specialized screens to manage transaction, manage static data and manage statement reader
- REST API
- Desktop Launcher
- Integration: Github + Travis CI + ReadTheDocs
